

# *The Leiden Genetic Colloquia*

*Biomedical Research Seminars Division V*

## **Program 2007-2008**

Wednesday, October 17

*Andrew McDonald*

*University of Edinburgh*

**Fine tuning of the adaptive immune response: pathogens flaunt convention**

Host: Ron Hokke

Wednesday, November 21

Symposium: Genome Instability

*Camilla Sjögren*

Karolinska Institute

**The SMC protein complexes -connecting chromosome segregation and repair**

Host: Niels de Wind

Wednesday, January 16

*Carl Heldin*

*Uppsala University*

**Signalling via receptors for PDGF and TGF- $\beta$  - possible targets in tumor therapy**

Host: Peter ten Dijke

Wednesday, February 20

Symposium: Cellular and Organismal Ageing

*Linda Partridge*

University College London

**The insulin/IGF-like signalling pathway and ageing**

Host: Eline Slagboom

Wednesday, March 19

*Kevin Campbell*

*Iowa University*

**Muscular Dystrophy as a complex disease: insights from mouse models**

Host: Silvere van der Maarel

Wednesday, April 16

Symposium: Stem Cells

*Jonas Frisen*

*Karolinska Institute*

**New neurons in old brains**

Host: Harald Mikkers

Wednesday, May 21

*Bart de Strooper*

*Leuven University*

**Regulated intramembrane proteolysis in Alzheimer's disease and apoptosis**

Host: Ton Raap
